

French and Italian port workers will not be complicit in the genocide in Palestine: block the ship loaded with weapons for Israel

Nazionale, 05/06/2025

USB Ports picks up the report of CGT colleagues from the Gulf of Fos who have mobilized to prevent the shipment of 14 tons of machine gun spare parts bound for the IDF in Israel.

In fact, today, June 5, these munitions are scheduled to be loaded in the French port and the ZIM ship bound for northern Israel and passing through the Port of Genoa tomorrow, June 6, is scheduled to depart.

The CGT dock workers have refused to load the pallets of ammunition and so, USB Port of Genoa dock workers have also called an action at the Port's Ethiopia Gate to prevent this ship from docking.

This is not the first time that dock workers and FSM class oriented unions have organized initiatives of struggle and internationalist solidarity with the Palestinian people.

The workers will not be complicit in the genocide in Palestine, they will not be complicit in the rearmament plans. That is why the USB has called a general strike for next June 20 under the slogan "DISARM THEM!" against rearmament and common defense, increased military spending and the devastation produced by decades of wage moderation, now exasperated in the name of war.

LONG LIVE INTERNATIONAL SOLIDARITY! LONG LIVE FSM!
